Is used in various outdoor activities

HIKING, TOURISM, TRAVEL

The main thing for any long walk is the light weight of the equipment. We do not take chairs on a long trip. But a light seat with an elastic band is the perfect solution! You don't have to carry extra weight, while you can always sit anywhere.

FISHING, KAYAKING, SAILING

It is an irreplaceable thing for any type of recreation and water sports. Who wants to sit in a wet place for a long time? Or to sit on a hard wooden seat? We make it possible to protect your bottom from cold and moisture simultaneously make any seat much softer.

WINTER SPORTS AND SNOW HIKING

It is widely used for snowboarding, skiing, ice fishing or hunting also for glacier climbing. To be safe from cold and moisture in frost tourists and athletes use our equipment in addition to their outfit.

WE HAVE DONE A
SURVEY AND FOUND
OUT THAT

80%

OF TOURISTS EXPERIENCE THE
FOLLOWING DIFFICULTIES WHEN
HIKING:

- It is difficult to sit on uneven and sharp rocks
- When morning dew appears and after rain, you cannot find a dry place to sit on
- In the evenings and in cold weather sitting on the ground is even dangerous for health
- Your pants get dirty quickly on a long hike because you have to sit on different surfaces.

HOW DO THEY SOLVE THESE
PROBLEMS?

HOW DO THEY SOLVE THESE PROBLEMS?

***Based on our research**

FOLDING MAT

This is the most common choice

1. It does not keep its shape
2. Takes up space in backpack or side pockets
3. If you want to change your seat you need to get up, shift a mat then sit down
4. It's too thin to sit on hard bumpy surfaces
5. Poor thermal insulation for winter usage
6. Actually there is no other usage than to sit or lie down on it

INFLATABLE MATS

Also a private solution

1. There is a possibility of puncture or abrasion, you need to have a repair kit
2. It must be removed from backpack and inflated before usage
3. It is inconvenient to be used on a short stop
4. There is no other usage than to sit or lie down on it

LIGHTWEIGHT CHAIRS

Only for short hikes or camping

1. Due to its weight and size, they are not suitable for a long hike
2. Designed for low weight users only
3. Assembly is required before usage
4. There is no other usage than to sit on it
5. Legs sink into loose soil

DON'T USE ANYTHING

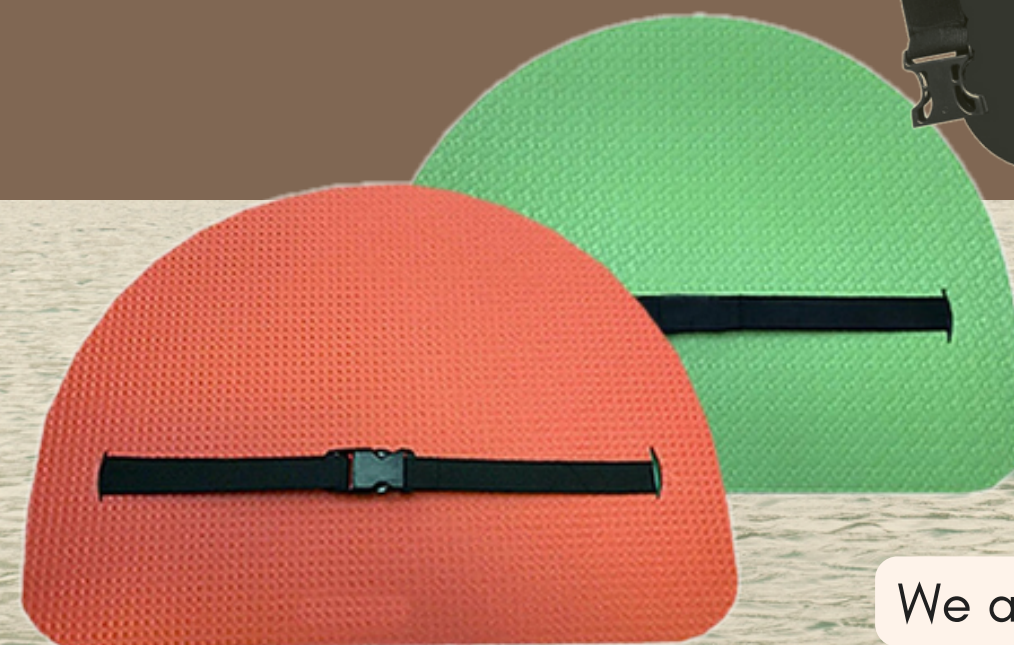

Haven't found a solution yet

1. Look for suitable stones, logs and other places to sit down
2. Do not travel in cold weather
3. Choose clothes that you don't mind getting dirty
4. Pay more for waterproof warm pants
5. Rest only in places where there are organized campsites

We want to offer a different solution

TOURIST SEAT ON AN ELASTIC BAND AND A FASTENER

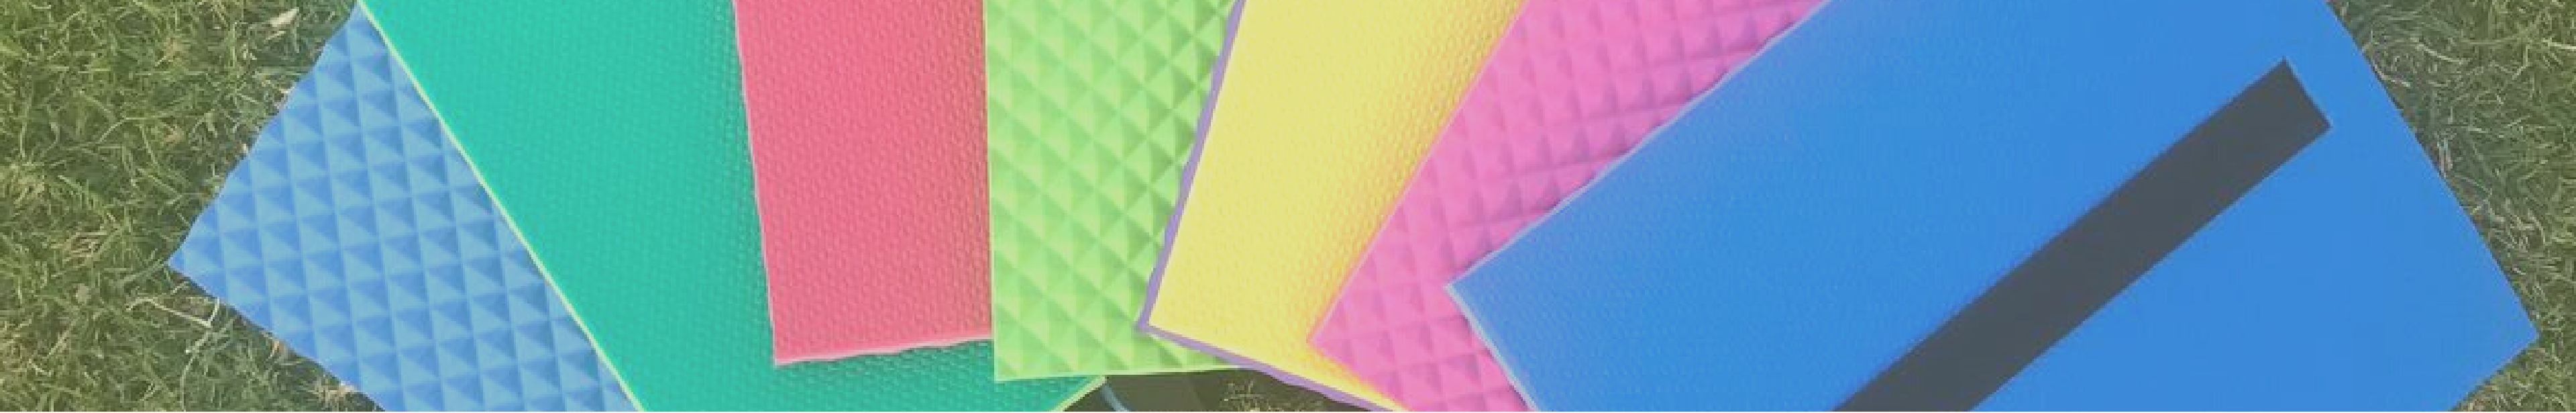

SUCH SEATS ARE WIDESPREAD IN EUROPE AMONG ALL CATEGORIES OF TOURISTS, FISHERMEN, KAYAKERS.

We are working on the production of different colors and shapes

LIGHTWEIGHT OUTDOOR SEATS

ABOUT

Hey! We are Maxim and Julia. We know how to quickly put up a tent in the dark, light a fire with one match, and arrange a trip to the forest even for forty people is not difficult for us! We also love to sit by the fire, sing songs and play the guitar. Julia loves mountains, and Maxim is delighted with kayaking on rough rivers. Our children have been hiking, fishing and traveling with us from an early age!

We created the Turtle Seat project to tell you about simple and extremely useful things that will make your vacation or sports much more comfortable!

Sincerely, Maxim and Yulia Slobodyan.

WE CARE ABOUT NATURE

Our top priorities are maximum environmentally friendly production and disposal. We always look for ways to minimize carbohydrate and waste emissions. We develop a community of travelers around the world who value the same principles.
